

JOB DESCRIPTION

JOB TITLE: SENIOR APPLICATION DEVELOPER
DEPARTMENT: DEVELOPMENT
REPORTS TO: DIRECTOR, DEVELOPMENT
FLSA STATUS: EXEMPT

Summary

Developing new application software, framework, and business components; learning and using new techniques, technologies, and tools; writing unit tests and test suites; designing and developing new product features; and maintenance, bug fixing, and performance improvement of existing software.

Essential Duties and Responsibilities

- Architecture, design and implementation of inherently scalable and high-availability systems supporting high volume and high concurrency transactional and reporting applications.
- Work alone or as part of a team developing robust business applications;
- Communication and collaboration with business users and stakeholders to analyze business needs, understand functional requirements, and develop documentation required to implement the solutions.
- Collaborate with development management and subject matter experts to establish the technical vision and analyze trade-offs between usability and performance needs.
- Provide occasional support of Production systems if need arises.

Education and Experience

- 7 – 10 years of Software Development experience.
- Have at least 5 years of hands-on experience and strong expertise developing with the Microsoft .NET framework, C#, ASP.NET MVC, ASP.NET WebForms, JavaScript, CSS, Bootstrap and jQuery.
- Minimum of 5 years of working experience with T-SQL.
- Have at least 3 years of experience with SOAP, and/or REST services development.
- Proficiency in Entity Framework and LINQ.
- Proficiency in JavaScript, CSS and jQuery.
- Strong knowledge of OOD principles and Test-Driven Development.
- Experience writing and using unit tests to validate development releases.
- Experience with agile development methodologies and strong knowledge of all phases of system development life cycle required.

Skills and Competencies

- Ability to concurrently handle multiple projects is necessary.
- Excellent problem solving and interpersonal communication skills are must.
- Must have a desire for achieving excellence in customer satisfaction, process and product quality and reliability.
- Have excellent oral and written communication skills.

- Enjoy being a member of a software development team.
- Thrive on technical challenges and take pride in finding elegant, sustainable solutions; constantly thinking of ways to improve our productivity, reliability, and code base.
- Knowledge of electronic billing and payment processes, disciplines and standards is a strong plus.
- Must be extremely detail-oriented.
